Installation of pads for both upper & lower sleeve corners

2-1: Installation of pads for both upper and lower sleeve corners :

Align the long edge of a pad with the long V-shaped edge of one sleeve and hold with one finger. Use the finger to gently push the pad's edge toward the aligned sleeve edge. The installation is finished when you hear a click, and the pad completely sits in the sleeve. Repeat the procedure for the other sleeve.

2-2: Installation of the damping foam:

The user can decide whether to use the damping foam or not, based on the phone case's thickness. Take off the releasing paper on **a** the damping foam (Figure 2). Place the combined piece on the phone holder bed.

Attention!

The pads of sleeve corners and damping foams are NOT necessary to install. It depends on your phone thickness including the phone case. The most important is to make sure your smartphone seated **closely into the phone holder** before any further operation. A vacant space may increase the damage risk when riding and using the phone holder.

3

Use of the adjustable anti-theft handle

3.1. Installation

Aim the cross-shaped hole at either end of **b** the adjustable anti-theft handle at **a** the anti-theft nut. Hook the handle to the nut. Move the handle so that the nut will be positioned in the handle's track. The handle is ready for use. Swivel the handle clockwise to tighten the nut or counterclockwise to unscrew it for adjusting the phone holder's angle.

3.2. Anti-theft function

Move the handle so that either cross-shaped hole of the handle will match the cross shape on the nut. Lift the anti-theft handle for retreat. The user can choose to hook the complimentary keyring in the product package to either pinhole on the handle for easy keeping.

Loosen up the left rearview mirror's nut and keep turning the mirror until you can take it off. Insert the disc base and revolving clamping arms combination into the dismantled rearview mirror and screw the mirror back to the motorcycle. When necessary, use the complimentary washer to ensure the disc base is firmly installed and does not jolt.

Install the phone holder and adjust the holder to get a desired angle. Tighten clamping arms by swiveling the anti-theft handle and make sure the phone holder is fixed at the desired angle. Move the disc base forward or backward to adjust its position for a proper angle, and make sure it does not block you from holding the hand clutch.

Note: When using the smart security lock, please do not put your finger between the clamping jaws (silver components) to avoid injury to your finger or compromise of the clamping strength.

5.1. Quick release of the phone holder.

Use the anti-theft handle to loosen the clamping arms and take off the phone holder. Remove the handle for basic anti-theft function.

5.2. Advanced anti-theft function.

After taking off the phone holder, continue to unscrew the nut using the anti-theft handle. When the two clamping arms are about one thumb apart, gently press the top of the clamping arms to remove the set.

5.3. Keep the phone holder and the clamping arms in a safe place.

Loosen the clamping arms and take off the phone holder (Figure 9). Add a quick-release ballhead at the bottom of the action camera. Mount the ballhead onto the clamping arms. Adjust the angle and use the anti-theft handle to tighten the clamping arms.

* Optional accessory: T-RC04

* Optional accessory T-RC05

7.1. Before setting the security lock, use one hand to pull down the lower sleeve corner to check whether the gliding is smooth.

7.2. Fasten the security lock, while keeping the sleeve corners open. Check whether the extended sleeve corners are firmly fixed and do not glide.

7.3. Unfasten the security lock. The sleeve corners will automatically return to their original positions.

* Inappropriate testing and use might damage the phone holder structure. Any damage due to this inappropriate handling is not covered by the standard limited warranty.

* If you have any concerns about the product use, please stop using it immediately and contact our customer service.
