SUNSHADE FOR MOBILE PHONE

It provides the most perfect sunshade effect from all angles, effectively refracts and blocks direct sunlight on the screen, improves the visibility of the mobile phone screen, slows down the temperature rise of the mobile phone, and is waterproof and dustproof.

PAHNTOM SD01 Infinitely adjustable extension design allows for smoother operation, providing optimal sunshade coverage from all angles.

PAHNTOM SD03 Made with Wonderlite® patented weather-resistant, UV-grade PC resin eco-friendly material. Featuring a dual-layer shade design, the upper layer is a deep black mirror-finish that effectively reflects and blocks UV rays, while the lower layer is a translucent smoked tint. This specially crafted transparency ratio blocks harsh light while maintaining optimal visibility.

PH08-AnvPro AnvPro

PH08-AnvR AnvR

- Dual Maglev ANV
- Maglev Anti-Vibration
- Safety Lock
- Secure Hold
- Wireless Charging
- BSMI Certification
- NCC Certification
- IP68 Waterproof Level
- Power Protection
- Anti-Theft Handle
- Multiple Applications
- Aerospace-Grade Aluminum alloys

According to the above figure, it shows the phone holder with ANV system could decrease the high frequency of shaking and vibrating effectively. It reduces the damage risk of the smartphone camera.

Note! Camera of the smartphone is precise, so the varied possibilities of damage couldn't be prevented at all.
