

1 Our sincere gratitude

Takeway® T1 clamp tripod is the best solution to most of the light tripods which lack in stability and strength. **Takeway® T1** is light and easy to carry without losing its function. The clamping and standing functions provided by **Takeway® T1** can be easily used on most of the consumer electronic products, such as a **DSLR**(see 6-2). With the accessory installed, it can also be used on a **Smartphone** (see 6-3). It is convenient to use and creates more possibilities. **Takeway® T1** only weighs 200g, and the load capacity of ballhead is 3kg. Its portability allows it to be carried in general handbags. You can enjoy its convenience no matter where you are.

2 Please test the relevant components and read responsibility statement before using this product

Before using this product on your DSLR or Smartphone, please check **Takeway® T1** clamp tripod and its accessories for damage or deformity. If there is any, please contact the salesperson to exchange your product to prevent damage of your consumer electronic products or personal injury caused by the flawed product. The company takes no responsibility and assumes no liability for the loss or inconvenience caused by user's own negligence.

3 Product components

4 Operation notes

4-1: When using on a flat surface, use the grid side of the clamp for stability or use the smooth side of the clamp to protect the surface from damaging.
4-2: The body of the clamp is made of aluminium alloy, but do not place the product in a humid environment for a long time to avoid product being damaged.

4-3: Do not place the product near heat or open flame which will damage the plastic components.

4-4: If the product has not been used for a long time, please check the components and functions work normally, so that it does not fall when it is used on the electronic products.

4-5: When shooting in standing position, please make sure that the tripod stands firmly on a flat surface.

4-6: After the product is assembled, please place it on a flat surface to check for its stability. When using this product for standing shooting, do not remove your hands from your electronic product when installing it on the clamp. Make sure that the clamp stands firmly on the surface before shooting, so that your electronic product will not be damaged caused by the fall of the clamp.

4-7: When shooting in standing position, please make sure the angle of the ballhead can still maintain the balance of the standing clamp. If you need to use a wider angle, please use the clamping function to prevent it from falling.

4-8: Please use this product with the following procedure. First stabilise the clamp, then mount your electronic product on the ballhead with the quick release clip, so that your product will not fall or drop caused by negligence.

4-9: **When opening the clampod jaw to the max opening 50mm, you will feel a little tight. STOP SCREWING ON!! Otherwise the clampod might be damaged. The company takes no responsibility to the damage from an incorrect action.**

5 Parts name

11 Indicator

When using the clamp on a cylinder or rod, please see the indicator on the clamp body, when the jaw go beyond the indicator like the picture below shows, you can use the inner jaw of clamp body for clamping to maintain stability.

As it shows, clamp the cylinder between the jaws and the inner jaw.

Use the clamp body for clamping when the indicator does not show.

12 Usage of the inner jaw

It allows users to clamp it on a small cylinder conveniently. It is made of highly reinforced plastic with high intensity. It has been installed inside the clamp in production. Please do not remove this 12 inner jaw away from the clamp for loss prevention.

Usage of the inner jaw

It allows users to clamp it on a small cylinder conveniently. It is made of highly reinforced plastic with high intensity. It has been installed inside the clamp in production. Please do not remove this 12 inner jaw away from the clamp for loss prevention.

Clamping range from 16mm to 30mm

As the drawing shows, the inner jaw is suitable for cylinders whose diameter is between 16mm to 30mm.

6 Assemblage and operation

6-1: Assembling, removing, and storing the stand

Please install 8 Stand first, so that you can shoot in standing position in anytime. The stand is firmly attached to the bottom of **Takeway® T1**, and you do not need to remove it when shooting. You can also store it in the pouch that comes with the product.

6-1-1: Assemblage for storage

As Fig. 1 shows, install 8 Stand on the axle, and you can hear a "click" sound when it is properly installed. Please gently pull the stand to make sure that the stand is firmly installed to prevent it from falling when using the product.

6-1-2: Remove the stand for storage

As Fig. 2 shows, remove the stand by tilting it.

6-1-3: Assemblage for shooting in standing position

As Fig. 1 shows, install 8.

Stand on the axle, and you can hear a "click" sound when it is properly installed. Please gently pull the stand to make sure that the stand is firmly installed to prevent it from falling when using the product.

6-1-4: Remove the stand in standing position

As Fig. 2 shows, remove the stand by tilting it.

6-2: Mount a digital (SLR) camera

6-2-1: Release 3 Quick release knob, and remove 1 Quick release clip.

6-2-2: Screw in 1 Quick release clip on your digital (SLR) camera with a coin or a flathead screwdriver. Please make sure that the quick release clip is screwed in tightly so that the camera does not loose from it.

6-2-3: Choose a proper side of 7 Jaw and clamp the tripod on a proper location. After it is done, shake the clamp gently to make sure it is fixed tightly so that it does not drop.

6-2-4: Mount 1 Quick release clip with the camera on 2 Mounting platform, and screw in 3 Quick release knob. When shooting, please use 4 Ballhead knob to rotate the camera freely in 360°. Adjust the camera to a proper position and you can start shooting.

6-2-5: When shooting in standing position, in order to maintain the balance during shooting, please turn the camera facing towards 9 Handle, just like the picture below shows.

Right direction

Wrong direction

6-3: Mount a Smartphone

Please install ③. Stand first before using so that you can shoot in standing position in anytime. The stand is firmly attached to the bottom of Takeway® T1, and you do not need to remove it when shooting.

6-3-1: Release ③. Quick release knob, and remove ①. Quick release clip.

6-3-2: Before shooting, screw in ①. Quick release clip on the side of the Smartphone holder with a coin or a flathead screwdriver. Please make sure that the quick release clip is screwed in tightly so that the phone does not loose from it.

6-3-3: Choose a proper side of ⑦. jaw and clamp the tripod on a proper location. After it is done, shake the clamp gently to make sure it is fixed tightly so that it does not drop.

6-3-4: Mount ①. Quick release clip with the Smartphone on ②. Mounting platform, and screw in ③. Quick release knob. When shooting, please use ④. Ballhead knob to rotate the camera freely in 360 degree. Adjust the phone to a proper position and you can start shooting.

6-3-5: Before reading or playing videos, screw in ①. Quick release clip on the back of the Smartphone holder with a coin or a flathead screwdriver. Please make sure that the quick release clip is screwed in tightly so that the phone does not loose from it.

6-3-6: Choose a proper side of ⑦. jaw and clamp the tripod on a proper location. After it is done, shake the clamp gently to make sure it is fixed tightly so that it does not drop.

6-3-7: When reading or playing videos, please use ④. Ballhead knob, which is able to rotate the phone freely in 360°, to adjust the phone to a proper angle for reading or playing videos. If you are using the clamp in standing position, please keep the balance of the clamp so that it does not fall.

6-4: Mount a G1 tripod (T1 Optional accessory)

6-4-1: Remove the Original T1 Stand

T1 comes with a Takeway® factory ① stand, as shown in figure. Remove the factory stand by sliding it upwards and store it in the storage pouch.

6-4-2: Assembling the T1

Line the groove of the G1 with the ① bottom crossbar of the T1 stand. Press and secure it. Attach the ⑤ fixing bracket with the mark facing forward (⑥ as fig shows). Attach the G1 to the clampod and secure it by tightening the screw. Shake it lightly to make sure that it is firmly fixed to prevent devices from falling during use.

6-4-3: Storage

③ ④ After assembling the G1 the support can be stored at the bottom when not in use to avoid obstacles when clamping. Please note that when storing, start with the ③ front feet.

6-4-4: Complete assembling the T1+

6-5: Installing and using ballheads of different brands

(When using a ballhead of different brand, please ensure the load capacity of the ballhead) *Before you start, we do not suggest shooting in standing position when a heavy ballhead of different brand is installed on the clamp, so that the clamp does not fall because of off-balance.

6-5-1: As Fig. 3 shows, remove the original ⑤. Ballhead from the clamp with a flathead screwdriver. Install a ballhead of different brand and screw in tightly. *For different ballheads, the size of the screw might be different as well. Some large ballheads will require a 1/4" -> 3/8" screw adapter. Please check the screw size of your ballhead before installation .

7 Specification of the product

Model number: T1 Clampod

Specs: Clamp body x 1, ballhead x 1, smartphone holder x 1, pouch x1, stand x1, inner jaw x1.

Size: Extended:12.5(L)x9(W)x16.4(H) cm
Folded:17.3(L)x 3.1(W)x15(H) cm

Weight: 207g (including ballhead)

Materials: Aerospace-grade aluminium alloy, nylon.

Screw of the quick release plate: 1/4"

Clamping range: Ø4 ~ Ø50 mm, flat surface 1-50mm

Ballhead load capacity: 3 KG

Clamp load capacity: 40 KG

*The maximum load capacity of Takeway® T1 clamp body is 40kg (including ballhead), but the maximum load capacity of the ballhead itself depends on its own design.

8 Safety warning

8-1: Please follow the operation notes. The company takes no responsibility for any man-made damage.

8-2: Please do not take your hands away from the clamp before it is fully stabilised, or your electronic product might be damaged from falling.

8-3: The product has a strong clamping force. Please do not screw too tight, so that it will not damage the clamped object.

8-4: Do not apply any volatile solvents (kerosene, paint thinner) on the product surface.

8-5: If the product is damaged or deformed from falling or impact, please stop using the product anymore, so that your electronic product will be damaged from any malfunction.

8-6: An adult must accompany when children under the age of 12 are using the product.
